

HYDRAMAX

Intensive Hair Therapy

Step by step

- 1** Wash hair with Pre-treatment Shampoo, repeat the application if necessary

- 2** Towel dry hair

- 3** Apply a small amount of SOS Hydramax into sections and massage it thoroughly

*The massage is very important in order to the product to be absorbed into the hair cuticle
A hot towel can be applied or any steam method in order to intensify the results. Leave the product on hair for 15 minutes*

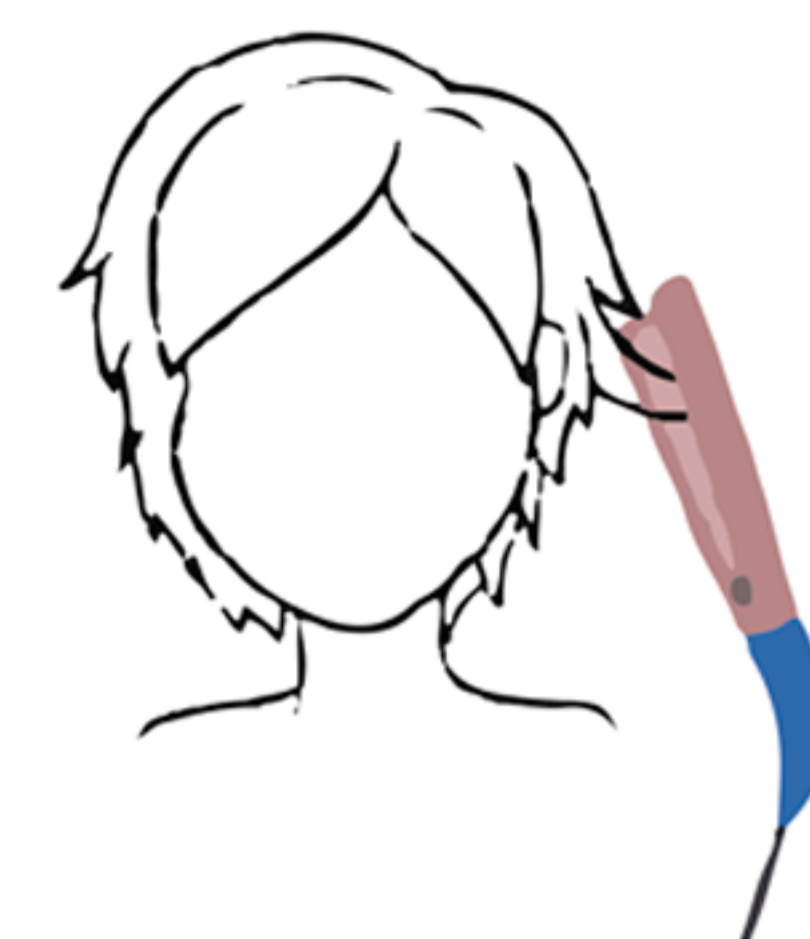

- 4** Rinse hair thoroughly

- 5** Blow-dry hair and finalize it as desired

- 6** Iron hair if needed. The table below indicates which temperature to choose according to the hair condition:

210 to 230 degrees	Coarse, thick hair
200 degrees	Fine, thin, frizz but in a healthy state
180 degrees	For fine, thin, fragile and frizzy hair, also in in case of blonde, bleached and highlighted hair

Hydramax can also be combined with **SOS Hairecontract** and **Smart Care Cell**. It should always be applied prior to those treatments.

The treatment is done, and the client can wash hair any time after that.
